

International Students Olympiad in Hot Bulk Forging and Extrusion Technologies 2018

QForm Olympiad in 2018 will be the 4th international event for students. This year students from 17 countries and 50 universities will take part in the International Students Olympiad 2018.

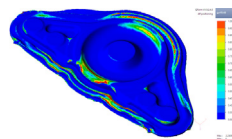

Stay tuned for updates and news about Olympiad events around the world!

Topbas Group (Bursa, Turkey) is a QForm user

 Topbas serves forging parts to world giants such as BMW, Rolls Royce, Ford and Fiat.

We are really happy that QForm's revolutionary development Gartfield makes remarkable easy to analyze material surface flow defects occur during forging process.

Alba Ferforje (Turkey) became a user of QForm

 Alba Ferforje (Sekerpinar, Turkey) who is a company from decorative forging industry became a user of QForm Software for their specific needs.

We are glad that QForm markets are expanding to such specific processes! Take a look at some production parts on the photos below.

QForm Extrusion seminars

Due to profile extrusion industry expanding, we start seminars dedicated to reduction of production cost and improving profile quality by means of new QForm Extrusion simulation software.

First seminar will take place in Moscow, Russia on 5-7 June 2018 within the 6th Conference and Exhibition «Aluminium-21/EXTRUSION».

On 9-11 October at booth 12J35 the second seminar will be held at the 12th World Trade Fair & Conference «ALUMINIUM 2018» in Düsseldorf, Germany.

Then, seminar in autumn 2018 will be held in Dubai, UAE, place and dates will be announced soon.
